

# RSC-BMCS Hall of Fame and Medal

The BMCS is pleased to announce the inauguration of The Hall of Fame and associated medal, to recognize prominent chemists for outstanding, sustained, and significant scientific impact, or contributions to any area of interest to the BMCS, eg medicinal chemistry, agriscience, bioorganic chemistry, chemical biology.

To be inducted in to the Hall of Fame, independent nominations should be submitted by e-mail outlining the justification and including the potential inductee's CV and publication list. The nomination may be further bolstered by additional independent letters of support.

Potential inductees should be resident in the continent of Europe, or have spent a considerable proportion of their career there. There is no requirement to be an RSC or BMCS member. There are no age restrictions, and potential inductees may have an academic or industrial background.

Nominations may be submitted from the beginning of March to the end of September 2018. The outcome will be communicated to nominators and potential inductees by mid-December 2018. Inductees will receive a medal and certificate and will be expected to give a plenary lecture at an appropriate BMCS organized conference.

For further details, see the full list of requirements and terms and conditions on the RSC website below.

Independent nominations should be sent by email to: [maggi@maggichurchousevents.co.uk](mailto:maggi@maggichurchousevents.co.uk)

Nominations may be submitted from 1st March – 30th September 2018.
